

Krystal SF™ Quickset Candy Base

With Bitter-Bloc Technology

Krystal SF is a sugar-free, easy to compound GRAS lollipop base with a natural bitterness blocking technology to block bitter notes found in many APIs. This base was formulated have a good taste / mouth-feel texture, **quick set time**, relatively low working temperature when adding temperature sensitive active(s), good mold release properties when used with our SmartPops child-resistant lollipop system, excellent suspending properties, can be colored, sweetened and flavored to preference and exhibits low moisture absorption in humid conditions.

Krystal SF Quickset 1Kg, Item# KB010-1000
 Krystal SF Quickset 2Kg, Item# KB010-2000

1. Calculate the quantity of each ingredient for the total amount to be prepared.
2. Accurately weigh/measure each ingredient. The finished average SmartPops cavity weight using Krystal SF Quickset Candy Base is ~7.6g (This takes into consideration subtraction of stick displacement). It is recommended that you compound placebos to determine the average total base amount.
3. Melt the Krystal SF Quickset Candy Base to 160°C. Do not overheat.
4. Remove from heat and allow to cool. Base is workable down to roughly 115°C. Pouring temperature should not exceed 150°C.
5. Mix remaining powders using the geometric dilution technique in the mortar using the pestle.
6. Pass the powders through a 40 mesh sieve onto a glassine sheet.
7. Once the Krystal SF Quickset Candy Base reaches a working temperature appropriate for the active(s) used, sprinkle powders into the melted base, prevent clumping, and ensuring addition is wetted before adding additional powder while maintaining a good working temperature.
8. Once the powder mixture has been added, incorporate the flavor and color and mix well.
9. Pour the mixture into the molds, quickly filling each cavity.
10. Set times will vary. Generally hard to the touch in 60 minutes and hard set in 2-3 hours.

Formulas and procedure should be adjusted base on use and the variety / quantity of ingredients to be used.

Equipment Required:

- Hot plate
- Beaker
- Thermometer
- Glass stir rod
- Prescription balance
- Mortar and pestle – triturate powders to reduce particle size
- Large glassine paper
- SmartPops Lollipop Molds, Sticks, Tags, and Caps (use only SmartPops brand sticks and caps)
